

Muriel Leff Mini Park

Ideas to Improve the Park

Community member Ihsan Dujaili has some ideas for improving Muriel Leff Mini Park, and we'd like to hear what you think about them! Please read a bit about the ideas, and send your feedback to msilva@sfnpc.org. Also, make sure to visit the park group website (<http://murielleffpark.weebly.com>) to register for updates!

1. **Painting the park's wood elements:** The park kiosk, benches and picnic tables are all in need of sanding and painting. Once the weather dries up, the Neighborhood Parks Council will be working with the Recreation and Park Department to host a painting day. We hope you'll join us! Stay tuned to the website for more info. **DONE!!!**

2. **Solar-powered lampposts:** The current lampposts at the park do not provide adequate lighting and are rusting. Ihsan feels that new solar-powered lampposts would not only improve the aesthetic quality of the park, but also be an example of sustainability and energy efficiency.

3. **A "zen" garden:** As Ihsan has described, his favorite feature at Muriel Leff is "its quietness and lack of traffic". At Muriel Leff, there is space to reflect on things, and achieve a sense of peace and calm. To supplement that feeling, Ihsan believes a "zen" garden would be a great addition to the park.

All of these ideas require **your** support! Some things will be achieved easily, while others will take more time. Please contact Matt Silva at msilva@sfnpc.org to learn more about how you can help!
